Biography

Dieter Rahmadiawan is a young lecturer at the Department of Mechanical Engineering, Universitas Negeri Padang, West Sumatera, Indonesia, and is currently pursuing a PhD in Mechanical Engineering at National Cheng Kung University, Taiwan. He holds both his Bachelor and Master degrees in Mechanical Engineering from Universitas Indonesia. His research interests span tribology, and the synthesis and characterization of a broad range of cellulose, biolubricants, nanocomposites, and nanofluids for machining applications, food packaging, and heat transfer fluids.

Scopus of the Last 5 Years

A Novel Highly Conductive, Transparent, and Strong Pure-Cellulose Film from TEMPO-Oxidized Bacterial Cellulose by Increasing Sonication Power. *Polymers*, Rahmadiawan D., 2023

Anti-UV, antibacterial, strong, and high thermal resistant polyvinyl alcohol/Uncaria gambir extract biocomposite film. *Journal of Materials Research and Technology*, Abral H., 2022

Highly antimicrobial and strong cellulose-based biocomposite film prepared with bacterial cellulose powders, Uncaria gambir, and ultrasonication treatment. *International Journal of Biological Macromolecules*, Abral H., 2022

Effect of Graphene Nanoplatelets on Tribological Properties of Bacterial Cellulose/Polyolester Oil Bio-Lubricant. *Frontiers in Mechanical Engineering*, Fuadi Z., 2022

White Ginger Nanocellulose as Effective Reinforcement and Antimicrobial Polyvinyl Alcohol/ZnO Hybrid Biocomposite Films Additive for Food Packaging Applications. *Journal of Composites Science*, Rahmadiawan D., 2022

Tribological Properties of Aqueous Carboxymethyl Cellulose/Uncaria Gambir Extract as Novel Anti-Corrosion Water-Based Lubricant. *Tribology in Industry*, Rahmadiawan D., 2022

The Enhanced Moisture Absorption and Tensile Strength of PVA/Uncaria gambir Extract by Boric Acid as a Highly Moisture-Resistant, Anti-UV, and Strong Film for Food Packaging Applications. *Journal of Composites Science*, Rahmadiawan D., 2022

Stability, Viscosity, and Tribology Properties of Polyol Ester Oil-Based Biolubricant Filled with TEMPO-Oxidized Bacterial Cellulose Nanofiber. *International Journal of Polymer Science*, Rahmadiawan D., 2021

MXene Based Palm Oil Methyl Ester as an Effective Heat Transfer Fluid. *Journal of Nano Research*, Rahmadiawan D., 2021

Advances in electrochemical technologies for sustainable wastewater treatment and chemical synthesis: mechanisms, challenges, and prospects. *Journal of Medicinal and Pharmaceutical Chemistry Research*, Zainul R., 2024

Comparative Analysis of the Influence of Different Preparation Methods on the Properties of TEMPO-Oxidized Bacterial Cellulose Powder Films. *Journal of Natural Fibers*, Rahmadiawan D., 2024

Rice straw-derived chitosan-enhanced plasticizers as biologically and environmentally friendly alternatives for sustainable materials. *International Journal of Biological Macromolecules*, Shi S.C., 2024

Composite of Carboxymethyl Cellulose/MXene and Span 60 as Additives to Enhance Tribological Properties of Bio-Lubricants. *Lubricants*, Gasni D., 2024

Enhancing the tribological performance of hydroxypropyl methylcellulose composite coatings through nano-sized metal and oxide additives: A comparative study. *Surface and Coatings Technology*, Shi S.C., 2024

Erythrosine- α -Dialdehyde Cellulose Nanocrystal Coatings for Antibacterial Paper Packaging. *Polymers*, Shi S.C., 2024

Enhanced Stability, Superior Anti-Corrosive, and Tribological Performance of Al_2O_3 Water-based Nanofluid Lubricants with Tannic Acid and Carboxymethyl Cellulose over SDBS as Surfactant. *Scientific Reports*, Rahmadiawan D., 2024

Effect of post-heat treatment on the UV transmittance, hydrophobicity, and tensile properties of PVA/Uncaria gambir extract blend films. *Heliyon*, Rahmadiawan D., 2024

Functional groups and moisture absorption of palm oil empty fruit bunch fibers/tapioca starch biocomposite film. *AIP Conference Proceedings*, Rahmadiawan D., 2023

Tribological Properties of Polyvinyl Alcohol/Uncaria Gambir Extract Composite as Potential Green Protective Film. *Tribology in Industry*, Rahmadiawan D., 2023

Enhanced UV blocking, tensile and thermal properties of bendable TEMPO-oxidized bacterial cellulose powder-based films immersed in PVA/Uncaria gambir/ZnO solution. *Journal of Materials Research and Technology*, Rahmadiawan D., 2023

The dispersion performances of bacterial cellulose nanofiber enhanced by TEMPO as ethanol-based nanofluid. *AIP Conference Proceedings*, Rahmadiawan D., 2023

Experimental investigation on stability, tribological, viscosity, and thermal conductivity of MXene/Carboxymethyl cellulose (CMC) water-based nanofluid lubricant. *Jurnal Tribologi*, Rahmadiawan D., 2023

Design and analysis of earth-air heat exchanger integrated into the building ventilation system. *IOP Conference Series: Earth and Environmental Science*, Lapisa R., 2023

Enhancing laminate composites: Investigating the impact of kevlar layering and titanium carbide nanoparticles. *Teknomekanik*, Oktaviani A., 2023

Enhancing mechanical properties of polylactic acid through the incorporation of cellulose nanocrystals for engineering plastic applications. *Teknomekanik*, Shi S.C., 2024

Synthesis and characterization of porous silica and composite films for enhanced CO_2 adsorption: A circular economy approach. *Journal of Materials Research and Technology*, Huang T.T., 2024
